HOWARD PAYNE UNIVERSITY

THE SCHOOL OF SCIENCE & MATHEMATICS

FORENSIC SCIENCE

OVERVIEW

The purpose of the School of Science and Mathematics is to provide programs and coursework to students in the fields of science, engineering, technology, and mathematics. The school also contributes course offerings for HPU's liberal arts and sciences general education curriculum. Undergraduate degrees are offered in the areas of biology, biomedical engineering, biomedical science, chemistry (with concentrations in biochemistry and forensic science), computer information systems, engineering science, information systems management, mathematics and software engineering.

COURSES DESCRIPTIONS

FRS 1479: Introduction To Forensic Science

This course provides an overview of forensic science field training for the science and non-science student alike. Principles of chemistry, such as chromatography and qualitative organic analysis, and other physical sciences are applied to crime scene analysis. Other popular methods, such as fingerprint and blood spatter analysis, are explored. Class time includes three hours lecture and two hours laboratory per week. Fall, Summer.
