

The Howard Payne University MBA

Helping Professionals Reach Further ... Achieving Life Goals

The Howard Payne University MBA was established for working professionals as a vehicle to explore career possibilities and to develop career paths which will enable them to achieve their career goals. Most of our students have found a new perspective on their existing careers or have been inspired to pursue new paths where they can influence outcomes. Our goal is to have graduates who surprise themselves with how they can change their world and see answers where others only saw problems.

The HPU MBA is designed for working adults to be completed in one calendar year, and about 50% of our students are aiming for that, however, there is no rush. The program will also accommodate the student who would rather take a slower-pace and finish over a two or three-year span. Our students come from large and small businesses, non-profits and government agencies as well as those seeking a career re-direction. There are also eager participants who have come straight from their undergraduate studies who wanted to further their professional studies while gaining some practical working experience during the day. The diversity of age, backgrounds and experience has added to the classroom experience.

Where we see the HPU MBA difference is in the application of theory and knowledge to professional goals. All of the classes are designed to have applied assignments where students can center the course material to personal career situations or objectives. Our objective for graduates is to build confidence to use the gifts God presented them with and to take the career opportunities before them which will earn significant income and career dividends ... and above all, change lives for the better for those around them.

HPU MBA students will:

- Learn to reason critically and analytically
- Solve problems faced by managers and entrepreneurs
- Develop an advanced understanding of applied business communications
- Demonstrate knowledge in the functional areas of business
- Develop career goals and learn how to leverage professional opportunities

HPU MBA Program Description
